

## Pulp Clamp

Pulp Clamps - There is a variety of forklift accessories available to make the machinery more helpful. A snowplow attachment could be mounted to the front of the forklift. A scoop bucket can be useful whenever the task requires moving sand, gravel, soil or snow. A double block handler allows the person operating the forklift to lift\carry two loads and after that stack them beside each other. Many of those accessories are considered excellent for light to medium tasks.

Another forklift accessory is the package lift clamp, which can lift and move really heavy pallets. Moreover, pallet crane forks may be used to lift and move pallets with an overhead crane. A drum clamp attachment is helpful for transporting really heavy drums from place to place with out having to use a pallet. Forklift mounted hoppers enable materials to be moved and dumped with out having to do it by hand. These hoppers are self dumping when the bumper is released.

There are also attachments available which could transform the lift truck into a commercial broom or mop. Such attachments are perfect for cleaning boat docks, storehouse flooring and parking lots. Forklift mounted platforms come equipped with dual entry doors and could be connected to be able to move workers from one site to another. The mounted platform accessory is great for reaching parts that are hard to access, particularly when you have goods or stuff stored in out of the way locations or really up high.

Attachments can be a very valuable piece of equipment when put in a forklift, transforming an typical forklift into a mobile hoist unit. It is most helpful when transferring uneven or awkward loads. This attachment could either be mounted on the carriage itself, telescopic, or be attached or even forklift mounted.
