

Barrel Clamps

Barrel Clamp - Known as "Barrel Clamp", this particular hydraulic accessory is actually used on lift trucks in order to squeeze items which you want to transfer using the lift truck. Usually, they are utilized in order to handle kegs, paper rolls and barrels, together with some barrel clamp designs having the ability to rotate the cargo. For instance, the revolving function enables the one operating the forklift to be able to put in a vertically stored paper into the horizontal intake of a printing press.
